Indianapolis VEX Robotics Championship (IndyVRC) | January 23 - 24, 2016 | Indiana Convention Center

Volunteer IndyVRC

Inspire students. Make an impact.

Dedicate 1-2 hours a week to serve as a role model for students in Indianapolis.

Robots are coming to Indy!

The IndyVRC enables over 1,000 Indianapolis students to work with STEM (Science, Technology, Engineering, and Math) and other industry professionals to design, build, and program a robot to compete against others in a sports-like game. The Mayor's Office eliminates financial barriers for teams to grow their robotics programs, but often a technical barrier still exists.

We need your help

We need volunteers to help guide teams in building their robots and preparing for the competition in January. Volunteers will have the opportunity to inspire students and make an impact in their community.

How you can help

Use your team-building, project management, organization, or technical skills to become a role model for local students. As a volunteer, you decide your schedule and time commitment.

Volunteer details:

- Volunteer August-January
- Available 1 - 2 hours a week
- Interest in technology and/or strong interest in working with kids
- Attend one of the workshops below to learn more about coaching robotics teams

Sign up today!

Sign up as an individual or with other people as a team of volunteers (teams are welcome to split the time commitment of working with a school).

Here's how:

- Go to **US2020's Indianapolis website**
- Become a member (login credentials may go to your SPAM folder)
- Search "VEX Robotics" to find teams near you
- Choose a team and click "Count Me In"
- Complete and verify your information
- A US2020 team member will contact you

How we can help you

Support for building and programming robots, game strategy, and team work skills is available at IndyVRC workshops led by the experts at VisualEdge. Workshops will be held Sept 19, Oct 17, and Nov 7.
